

Product Designer with 7+ years of experience designing B2B SaaS, B2C apps, complex workflows, and scalable design systems. I turn user research, usability testing, and product data into web and mobile solutions that improve adoption, retention, and workflow efficiency. Experienced in end-to-end design from discovery and IA to high-fidelity UI, interactive prototypes, developer handoff, and AI-assisted design workflows.

## Experience

### Product Designer · Zhelezno (2022–Present)

*Zhelezno is a real estate developer of smart residential districts in Russia with over 500k monthly users.*

- Redesigned complex B2B dashboards and admin workflows into scalable product solutions, improving usability, navigation, and enterprise readiness.
- Shipped an employee mobile app used daily by 65% of staff, accelerating task completion in complex workflows by 27%.
- Conducted usability testing and customer interviews, increasing B2B dashboard retention by 42% within 13 months.
- Established a web and mobile design system, UX patterns, and developer documentation, increasing development speed by 50% and cross-functional communication by 26%.
- Integrated AI-assisted workflows using ChatGPT, Claude, Figma AI, and Codex to speed up research synthesis, UX copy exploration, prompt-based design ideation, documentation, QA checklists, and developer handoff while maintaining human review and product consistency.
- Engaged stakeholders throughout the design process, improving roadmap alignment and reducing feature rework by 23%.
- Promoted to Lead Product Designer after 2 years, mentoring a junior designer and improving feature delivery time by 14%.

### Product Designer · ServiceHub (2021)

*ServiceHub is a fintech platform powering services for banks and insurers; its marketplace serves 142K+ B2B clients.*

- Improved the usability of the Multifinance SaaS platform through UX testing and iterative design improvements, increasing employee workflow efficiency by 9%.
- Designed a 0-to-1 fast-loan banking app, driving 30 loan completions within 2 weeks post-launch.
- Created branding and a conversion-oriented landing page for a local IT industry festival, generating 37+ qualified leads.

### UX/UI Designer · Apple Concierge (2020–2021)

*Apple Concierge is an international provider of digital services for retail and banking with over 174k monthly users.*

- Designed 0-to-1 B2B delivery and food service apps adopted by major banks, including Gazprombank, Sberbank, and Alfa-Bank, increasing service value by 23%.
- Redesigned KPI dashboards and metric-tracking workflows, reducing manager workflow time by 12%.
- Led the end-to-end design process from user experiments and wireframes to polished UI and interactive Figma prototypes, improving mobile app user flows by 19%.

### UX/UI Designer · CTC Media (2020)

*CTC Media is the largest media holding in Russia with 150M+ viewers, streaming service (9.5M users).*

- Redesigned key B2C/B2B marketplace flows, improving user journeys and driving adoption among 4K+ active users.

## Skills

Product strategy, discovery-to-delivery, user research, customer interviews, usability testing, insight synthesis, information architecture, user flows, wireframes, prototyping, A/B testing, metrics & KPIs, prioritization & trade-offs, accessibility, design systems, component libraries, design tokens, Figma components, variables, interactive prototypes, developer handoff, documentation, ChatGPT, Claude, Codex, Figma AI, AI-assisted research synthesis, UX copy exploration, prompt writing, design documentation, QA checklists, cross-functional collaboration, roadmap alignment, working with PMs, engineers, QA, and business stakeholders.
